Subj: BUDGET MODELS AND SPENDING PLANS

Ref: (a) CG Finance Center SOP (FINCENINST M7000.1) (NOTAL)
(b) Financial Resource Management Manual (COMDTINST M7100.3A) (NOTAL)

1. PURPOSE. This Instruction establishes policy regarding the maintenance and use of the District and Field Budget Models as well as the submission of Spending Plans. This Instruction is intended for use by financial managers at Headquarters, areas, MLC's, districts, and Headquarters' units.
2. ACTION.
 - a. District commanders shall ensure compliance with the provisions of enclosure (1).
 - b. Commanders, maintenance and logistics commands, area commanders, commanding officers of Headquarters' units, and chiefs of offices and special staff divisions at Headquarters shall ensure compliance with the provisions of enclosures (2) through (6).

COMDTINST 7132.5

3. DISCUSSION. Budget models and Spending Plans help to fulfill four financial management objectives as follows: (1) they provide the entire chain of command with a better understanding of the Coast Guard's Operating Expenses (OE) base; (2) they highlight the importance of the proper stewardship of CG monies; (3) they enhance financial integrity across Allotment Fund Codes (AFC's) and appropriations; and (4) they provide information with which to more intelligently set funding priorities across AFC's and Administrative Target Units (ATU's). Thus, they are tools which enable CG managers to more wisely allocate limited funds and enhance the stewardship of CG monies.

BUDGET MODEL GUIDANCE

1. General. The District Budget Model is the first significant effort to quantify the AFC-30 budgets of the 10 districts using an objective standards based methodology. It accomplishes this by assigning a funding standard to all of the various assets and services within a district. The summation of the funding for each standard determines the appropriate funding level for the district. Incremental or decremental changes to a district's assets or service requirements ideally will cause an associated incremental or decremental change in the funding level of that district in accordance with the applicable standard. The Model represents the most in-depth analysis ever conducted of the recurring funding provided to the districts. The Model addresses recurring AFC-30 funding only and does not address nonrecurring funding such as energy, wage grade, and funding provided on a onetime basis from HQ program managers.
2. Model Description. The Model was developed using three funding areas: (1) assets (e.g., boats, aircraft, vehicles and ships), (2) services/requirements (e.g., telecommunications, operational travel) and (3) district unique (e.g., leases, D8 offshore helo contract and D14 dive teams). Enclosure (2) provides a more in-depth description of these funding areas and the algorithm used.
3. Acceptable Range. The degree of confidence associated with most of the Model's standards is quite high. However, because the District Budget Model represents the Coast Guard's initial effort at a standards-based model, an acceptable range was developed and applied to the funding target for each ATU. Presently, this acceptable range is plus or minus 7.5%. In essence, the funding level predicted by the model is kept within 7.5% of the district's base. If a district's base is within this acceptable range, then no change is made to the base. The ultimate goal is to reduce the confidence interval to zero.
4. Policy.
 - a. Commandant (G-CFP) shall fully implement the District Budget Model in FY95.
 - b. Commandant (G-CFP) shall also ensure that the Model is updated annually, including revised model standards. Annual adjustments will be made to district targets based on changes of assets or other modifications to the Model.

Encl. (1) to COMDTINST 7132.5

- c. The Headquarters program manager requiring additional assets is responsible to fund any increases in district budgets which are a result of increases to asset quantities. Questions regarding changes to the Model may be directed to Commandant (G-CFM-2).
- d. Because the Model is asset driven, accurate asset lists are essential for control and equity. The HQ staffs listed below are responsible for maintaining accurate lists of those assets within their program:

<u>Asset List</u>	<u>Responsible Staff</u>
Vehicles	COMDT (G-ECV)
ATON	COMDT (G-NSR)
Boats	COMDT (G-NRS)
Building sq. ft. (except housing)	COMDT (G-ECV)
Aircraft	COMDT (G-OAV)
WPB	COMDT (G-OCU)
WTGB	COMDT (G-NIO)
ATON vessels	COMDT (G-NSR)
CG owned housing units	COMDT (G-PSP)
M inspection billets	COMDT (G-MP)
Security contracts	COMDT (G-OIS)

- e. Approved asset lists shall be updated in accordance with the following schedule:

15 JUL	Commandant (G-CFM-2) makes annual update to the Asset List. <u>Note:</u> HQ staffs (as designated in paragraph 4.d. above) may submit asset inventory changes to Commandant (G-CFM-2) at any time during the year.
1 AUG	Commandant (G-CFM) distributes draft District Budget Model to districts and program managers.
15 AUG	Districts complete review of the draft Budget Model and work with appropriate program managers to address and resolve discrepancies.
1 SEP	HQ staffs (as designated in paragraph 4.d. above) provide final asset list to Commandant (G-CFM).
15 SEP	Commandant (G-CFP) approves and promulgates the District Budget Model to program managers and districts.

- f. The District Budget Model will be used to calculate all funding modifications for all resource changes ((e.g., Operating Facility Change Orders (OFCOs) and Resource Change Proposals (RCPs)) pertaining to districts.
- g. Should the District Budget Model predict the distribution of more funding for districts than is available, a percentage reduction may be applied to specific standards in the Model and/or to the overall targets of all districts to bring the Model's funding levels in line with available funding (see the algorithm contained in enclosure (2)).
- h. The Integrated Budget System (IBUDS) will be used to request funding for new district unique items and nonrecurring items. Any district unique items which are approved will be incorporated into the District Budget Model in subsequent years. Commandant (G-CFM) will also use IBUDS to distribute the funding for each district based on the District Budget Model. A copy of the Model's calculations will be provided to each district and program manager (on 1 August) via separate correspondence.
- i. An automated Field Budget Model has been developed for the districts. The Field Budget Model is designed to receive information from the District Budget Model and subdivide the received information into the appropriate levels for district units. District commanders shall distribute funds to subordinate commands via the Field Budget Model. Program documentation and specific instructions of the Field Budget Model for use will be provided separately. Each district shall provide Commandant (G-CFM-2) with an information copy of the Field Budget Model indicating the annual initial distribution of funds.
- j. Recommended changes to the Field Unit Budget Model will be submitted to Commandant (G-CFM-2).

DISTRICT BUDGET MODEL DESCRIPTION

There are three major categories used within the District Budget Model to provide funding to the districts. These categories are:

- (1) Assets - These are items which are generally applicable to more than one district and for which a common funding level can be determined. A list of the assets is shown below.
- (2) Services/Requirements - These are items which are applicable to more than one district, but for which a common funding level is not applicable. Examples of these items are operational travel, hazardous wastes, and telecommunications.
- (3) District Unique - These are items which are unique to an individual district. Examples of these items are D14 Dive Teams, A-76 contracts, and property leases.

The funding provided to the districts is calculated by the following equation:
(Number of assets items) * (Appropriate asset funding standard) *
(Regional Inflation Factor) + (Service/requirement standard) +
(District unique standards)

ASSETS AND COMMON FUNDING LEVELS

Note - The funding level for these discrete line items is current as of FY93 and may change based on revised data.

SPENDING PLAN GUIDANCE

1. General. Spending Plans were developed in order to gain a better knowledge and understanding of how Operating Expenses (OE) monies are budgeted, the costs of certain programs or projects, and as a tool to manage the base. In addition, a review was necessary to help validate that planned expenditures are in compliance with appropriation law and Allotment Fund Code (AFC) definitions.
2. Policy.
 - a. Commanders, maintenance and logistics commands, Area commanders, commanding officers of Headquarters units, and chiefs of offices and special staff divisions at Headquarters shall submit Spending Plans for their AFC-30 accounts (For HQ offices, this includes funds planned for transfer to the field). Also, AFC-56 spending plans shall be submitted every three years (i.e., FY96 and FY99). Guidance on the categories to be used will be issued separately by the AFC-56 manager. All Spending Plans from HQ units will be submitted via the program manager.
 - b. The MLC/Area Spending Plans shall include only summary data for field units consisting of two entries, one consisting of the budgeted recurring amount and one consisting of the nonrecurring amount.
 - c. District commanders shall submit spending plans only for work-life staff AFC-30 accounts.
 - d. AFC-41, 42, 43, 45, 54, 56 and 57 managers will submit Spending Plans for all funds contained in their AFC, including those funds planned for field distribution. The following format or policy modifications apply:
 - (1) AFC-42, 43 and 45 shall submit project lists.
 - (2) AFC-54 shall submit ammunition and pyrotechnic requirements and projections.
 - (3) AFC-56 shall submit an annual Spending Plan for Headquarters retained funds which will contain line items for accession training categories (Recruit training, Class "A" school, Basic Flight, OCS, NAPS, and Cadet Disenrollment) as well as line items for each program's postgraduate, staff and service-wide training.
 - (4) AFC-57 shall provide projected costs for the Coast Guard's health care and delivery system.
 - e. Spending Plan submissions will be based on current Sources of Funds for HQ offices and the current funding base for field units. Do not include anticipated Cost of Living Allowance (COLA).

- f. Spending Plan submissions will be divided into the categories outlined in enclosure (4). A complete definition of each object code is contained in Appendix F of reference (a). It is important that funds managers train personnel and implement local procedures to ensure that applicable object codes for each budget category are utilized. This will facilitate and expedite interim and year-end reconciliation of budgeted versus actual expenditures via the Departmental Accounting and Financial Information System (DAFIS).
- g. Spending Plan submissions will be made using the Integrated Budget System (IBUDS) for all ATU's and for HQ Offices so equipped. Enclosure (5) provides an example of an IBUDS submission and the level of detail desired. Units or staffs without IBUDS capabilities will submit their Spending Plans on the form provided as enclosure (6). Regardless of submission format, each line item shall be accompanied by a description of the item in addition to an explanation of the purpose for the item (i.e., what is being bought and why is it needed).
- h. Identify any line item or any line item mandated by law by citing the law at the beginning of the IBUDS Item Description Field.
- i. As an option, a list of the lowest priority line items which total 10% of the command's or office's discretionary funds may be submitted with the Spending Plan. The format will be a listing of the budget category, line item description and amount of that line item which is considered as the lowest 10%. Because of the changing nature of requirements, a revised list may be submitted at any time.
- j. In the event that the approved Spending Plans are delayed past the start of the fiscal year, funds managers may spend for items and projects which were approved in the previous fiscal year (FY). New items or projects which are time critical but not yet approved may be commenced only after telephonic approval by G-CFM.
- k. Commandant (G-CFM) will conduct a budget vs. actual analysis on selected categories using DAFIS records.

Encl. (3) to COMDTINST 7132.5

1. The following timetable will apply:

1 MAR	Commandant (G-CFM) call for Standard Personnel Cost (SPC) data to applicable AFC managers and Headquarters offices.
15-31 MAR	Commandant (G-CFM/G-CBU) enters recurring Financial Transfer Authorizations (FTAs)/Change in Financial Plans (CIFPs) into the Source of Funds (SOF).
1 JUL	Field ATU Budget submissions due.
15 JUL	HQ Units submit Spending Plans to HQ programs managers. HQ Spending Plan Training Seminar is held.
1 AUG	MLC/Area Spending Plans due. District work-life Spending Plans due. HQ Programs submit HQ Unit Spending Plans to Commandant (G-CFM).
15 AUG	HQ Spending Plans due. (If draft OPSTAGE is not yet published, modifications to Spending Plans will be permitted subsequent to draft OPSTAGE).
1-15 OCT	Approved Spending Plans sent from Commandant (G-CFM) to the originator. Contact Commandant (G-CFM) to obtain a waiver to execute time critical spending prior to receipt of spending plan approval.
30 OCT	Commandant (G-CFM) commences budget vs. actual analyses.
